

Mounting instructions:

Note: Different wall materials require different types of fasteners. Use fasteners suitable to your installation (not included)

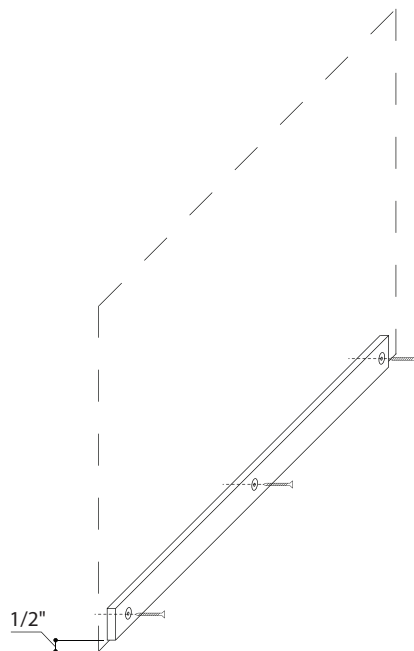

1

Place metal profile centered at the upper end of the desired location. Use suitable anchors and screws to secure the metal profile to the wall. (For shipping purposes the metal profile is attached to the wood profile depicted in stage 3)

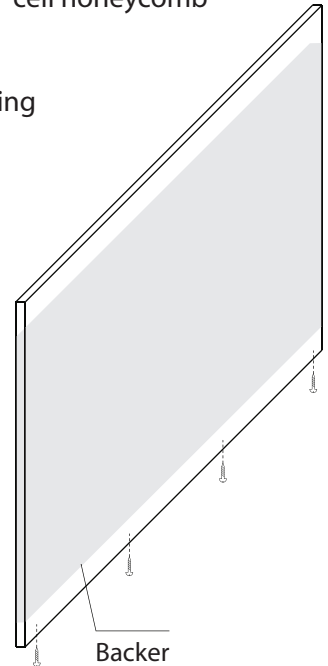

2

Hang magnetic board on the metal profile. Mark the underside height of the board.

3

Remove the magnetic board. Place the wood profile centered at the lower end of the board 1/2" above the mark line. Use suitable anchors and screws to secure the wood profile to the wall.

4

Place the magnetic board back in place. The underside screw holes must face down. Use supplied screws to secure the underside of the board to the wood profile.

Technical details:

Mounting:
Built-In french cleat system

Orientation:
Landscape or Portrait

Dimensions:
Standard:
3' x 3' actual dims. 33.5" x 33.5"
3' x 4' actual dims. 33.5" x 45.5"
3' x 5' actual dims. 33.5" x 57.5"
3' x 6' actual dims. 33.5" x 69.5"

Custom:
Up to 22-24 sq. ft. per unit.
Large wall areas can be covered by using 2 or more units side by side.
All walls are 3/4" deep

Material:
20 gauge non-rusting galvanized sheet metal

Weight:
1.45 LB per 1 sq. ft.

Backer:
Laminated 1/2" cell honeycomb

Coating:
Powder-Coating
